

TOGETHER, LET'S CURB THE CRISIS.

Secure Meds

Keep your medications in a cabinet that locks.

Count your prescription pills every two weeks to make sure that none have been removed by someone else.

Dispose of Properly

Use safe-disposal locations or events, or mix unneeded medications with inedible substances before placing in the garbage.

Don't flush, put down the drain, or toss as is in the trash. Scratch out all personal information on the original prescription bottle.

Don't Share

Use medications only as prescribed. Talk to your pharmacist to learn more.
